1. Introduction

1.1 Lead and Supporting Agencies

Lead Agencies	Supporting Agencies
Emergency Management Department (EMD)	CALFIRE/Riverside County Fire Department, Riverside University Health System - Public Health (RUHS-PH), Community Action Partnership (CAP) National Weather Center

1.2 Emergency Support Function Responsibilities

Department	Responsibilities
Emergency Management Department (EMD)	• Coordinate with appropriate County Departments and partner agencies regarding potential impacts from extreme weather • Coordinate with EMD Public Information Officer (PIO), Public Health PIO and Community Action Partnership to ensure wide distribution of available cooling centers (print, websites, etc.) • Disseminate accessible disaster information in coordination with first-responder agencies • Coordinate response efforts at the County/Operational Area Emergency Operations Center (OA EOC), if activated • Primary coordination point for the Multi-Agency Coordination System (MACS) – distribution of scarce resources (non-first responder agencies) • Represent County Departments, unincorporated areas, cities, special districts, tribal partners and political subdivisions

Department	Responsibilities
Emergency Management Department (EMD)	▪ Work directly with the State of California Governor's Office of Emergency Services – (Cal OES) to submit Proclamations of Local Emergency and, if applicable, to request a Gubernatorial Proclamation and Presidential Declaration on behalf of the County and the OA ▪ Manage/update departmental websites with pertinent information ▪ Staff EOC positions as required ▪ Coordinate information sharing with all County Departments ▪ Activate the Private Sector Coordination Support Annex as required to aid in meeting community unmet needs ▪ Notify/coordinate with healthcare facilities as appropriate ▪ Develop and send appropriate Riverside Emergency Medical Services Agency (REMSA) alerts
CALFIRE/Riverside County Fire Department	▪ Public Information coordination in the Joint Information System ▪ Manage/update departmental websites with pertinent information (e.g., cooling and heating centers) ▪ If applicable, inform EMD Duty Officer regarding an increase in calls in a particular area due to heat or cold related illness ▪ Utilize or assist in Alert & Warning Systems if applicable ▪ Staff Fire & Rescue Branch Director positions in the EOC if required
Riverside University Health System - Public Health (RUHS-PH)	▪ Serve as the lead agency for issuing medical/health warnings due to extreme weather ▪ Coordinate public information messaging with EMD, Fire and other departments or agencies, as required ▪ Assist with staffing the Medical/Health Department Operations Center (MH DOC) ▪ Staff the Medical & Health Branch Director position within the EOC, if requested ▪ Public information coordination within the Joint Information System ▪ Manage/update departmental websites with pertinent information

Department	Responsibilities
Community Action Partnership (CAP)	▪ Upon notification from a department of cooling system issues or failure, CAP and participating jurisdictions will prioritize affected facilities for restoration services ▪ When possible, CAP will provide departments experiencing cooling system failure with fans or other interim cooling measures ▪ If warranted, CAP may recommend suspension of a cool center due to cooling system failure if remaining in the building is deemed to be unsafe due to extreme temperatures ▪ Staff the Facilities Unit Leader position within the County EOC if requested

2. Background

A Concept of Operations (ConOps) provides the framework to respond to and recover from disasters. This document should not be considered all-inclusive therefore, departments not listed within should continue to coordinate with the Emergency Management Department during an extreme weather event. Each department should have emergency plans for both Continuity of Operations/Government as well as plans to ensure their ability to recall staff, utilize key contractors and vendors, and other response activities.

3. Purpose

A ConOps provides a brief outline of integral departmental roles and responsibilities for departments that are most-likely to play a role within the first 12-48 hours; however, if a department is not defined in the document this does not imply that they will not play a vital role in disaster response within any timeframe.

4. Scope

This ConOps will provide an overview of the response and recovery operations that will likely take place or may be expected of County Departments during heat, cold or wind event emergencies. Although mitigation and preparedness effort are key elements in emergency management, this document will focus on the response operations.

This ConOps will primarily outline the services departments will provide during extreme weather emergencies. For some departments, this role is very different than their “normal” day to day functions. For the purposes of this document, the term “emergency operations role” shall refer to the services or functions that are above and beyond their typical departmental services. Such roles may be indicative of extreme weather emergency situations only.

5. Audience

This ConOps is intended for County Departments to aid in the understanding of, the

response to, and recovery from weather related emergencies that may cause impacts to life, property, or the environment.

6. Response Components

6.1 EOC Activation Triggers & Staffing Matrix

An activation guide has been created to establish triggers, to identify when the County EOC may activate and to determine the level of staffing that may be required. The activation guide is at the end of this document (Attachment A).

7. County Function Overview

7.1 Alert & Warning

The County maintains several tools to aid in the dissemination of information to the public; these tools may prove valuable during any weather-related emergency. Although not all systems are outlined in this document, the systems commonly used are described here:

- Websites: Departments such as EMD, Public Health, Sheriff's Department, Community Action and Fire actively update their websites to share disaster information as well as preparedness information such as Cooling and Heating Center locations and tips to beat the heat and the cold.
- Warning & Notification System: EMD, Fire, Law and Public Health can activate an internet-based warning and notification system. The system allows messages to be easily scripted and sent based on the affected area's mapping parameters. This system could be functional during weather related emergencies if Public Health officials needed to issue an alert or warning to a particular geographic area.

7.2 Public Information

There are several key components to accessible public information during a disaster. Some of the key elements are:

- Rumor Control: Monitoring media is critical to know what the public is reading or hearing, and how they respond. Media monitoring enables the County to redirect wrong information sources to reliable sources. PIOs must work together during the response and recovery phases. During an EOC activation, the Public Information Officer is responsible for this function. In a large disaster, several staff will be needed to fill the responsibilities of this function.
- Joint Information System (JIS): The JIS connects all PIOs during an emergency. The JIS explains how PIOs will share information with each other to support the overall incident. The County PIO has the ultimate authority over public messaging on behalf of the County. Departments who wish to release public messages during a disaster should work through the JIS to ensure proper review and approval of all messaging.
- Joint Information Center (JIC): A JIC is a virtual or physical location where all PIOs involved in an incident work together to coordinate messaging. A JIC is a location where PIOs gather to work collaboratively and efficiently to reduce the waiting periods for feedback and approval.

For a complete list of Cooling Centers that includes operating hours and cross streets, please visit: https://capriverside.org/cool-centers

ATTACHMENT A – EMERGENCY OPERATIONS ACTIVATION GUIDE – EXTREME WEATHER

Level	Minimum Staffing	Weather
Level 1 (Highest) Highest)	All Sections All Branches Units, as necessary	Major wide-spread flooding with damage Major wind damage
		Forecasted Weather Event: A damaging weather event forecasted (within 12 hours) by the National Weather Service with potential impacts beyond local capabilities. **Resource Requests:** Event with significant resource requests. **Impacts to neighboring OAs:** Current activation level, experiencing significant damage resulting in resource requests, conditions worsening, and/or evacuations. **Impact to County:** 3 or more County unincorporated areas impacted. **Impacts to Local Governments:** 3 or more local governments (e.g., cities, special districts) or tribal governments impacted and/or proclaimed.
Level 2 (Moderate)	All Sections Branches, as necessary Units, as necessary	Moderate flood damage Moderate flood warning Wind warning
		Forecasted Weather Event: A significant weather event forecasted (within 12-24 hours) by the National Weather Service with potential impacts beyond local capabilities. **Impact to County:** 2 or more County departments and/or unincorporated areas impacted. **Impacts to Local Governments:** 2 or more local governments (e.g., cities, special districts) or tribal governments impacted and/or proclaimed.

Level	Minimum Staffing	Weather
Level 3 (Lowest)	- EOC Director - EOC Deputy Director - EOC Manager - Liaison Officer -Public Information Officer -Whole Community Branch Director -All Section Chiefs - Situation Status Unit Leader - Advance Planning Unit -Documentation Unit Leader -Commodities Unit Leader -Technical Support Branch Leader - Message Center Unit Leader -RACES Unit Leader -RACES Group	Minor Flooding Wind Watch Flood Watch
		Forecasted Weather Event: A significant weather event forecasted (1-2 days prior) by the National Weather Service with potential for impacts beyond local capabilities. **All Weather Events:** Weather event is occurring (e.g., minor flooding) or imminent (e.g., wind or flood watch) that impacts one supervisorial district.

	Minimum Staffing	Weather
Management Watch* EMD DOC Activation	Duty Chief Duty Officer Other EMD Staff, as necessary	Isolated Weather Event **Management Watch occurs when the situation warrants greater attention than the Duty Officer Level but does not rise to an unusual event.* *EMD DOC activation occurs when the event or potential event support needed does not immediately rise to an EOC Activation Level and exceeds the staffing needs of the Management Watch.* **Forecasted Weather Event:** A significant weather event forecasted (3-4 days prior) by the National Weather Service with potential impacts. **Advisories:** Storm, wind, flood, air quality, freeze and heat advisories. **Drought:** Infestation (e.g., Bark Beetles), water levels, and water quality.
Steady State	Duty Officer	

Disclosure: Any actual or imminent event with financial, political, physical, or social impacts to residents or county departments may warrant an EOC activation.
